

READINGS IN

NATURAL LANGUAGE PROCESSING

EDITED BY

Barbara J. Grosz
Karen Sparck Jones
Bonnie Lynn Webber

CONTENTS

| | |
|---|-----|
| Acknowledgments | vii |
| Introduction | xi |
| I. SYNTACTIC MODELS | 1 |
| 1. On the Mathematical Properties of Linguistic Theories | 5 |
| <i>C. R. Perrault</i> | |
| 2. Multiple-Path Syntactic Analyzer | 17 |
| <i>S. Kuno and A. Oettinger</i> | |
| 3. An Efficient Context-Free Parsing Algorithm | 25 |
| <i>J. Earley</i> | |
| 4. Algorithm Schemata and Data Structures in Syntactic Processing | 35 |
| <i>M. Kay</i> | |
| 5. Transition Network Grammars for Natural Language Analysis | 71 |
| <i>W. A. Woods</i> | |
| 6. A Computational Account of Some Constraints on Language | 89 |
| <i>M. Marcus</i> | |
| 7. Definite Clause Grammars for Language Analysis | 101 |
| <i>F. Pereira and D. Warren</i> | |
| 8. Parsing in Functional Unification Grammar | 125 |
| <i>M. Kay</i> | |
| 9. DIAGRAM: A Grammar for Dialogues | 139 |
| <i>J. Robinson</i> | |
| II. SEMANTIC INTERPRETATION | 161 |
| 10. Tarskian Semantics, or No Notation Without Denotation! | 167 |
| <i>D. McDermott</i> | |
| 11. Language and Memory | 171 |
| <i>R. Schank</i> | |
| 12. An Intelligent Analyzer and Understander of English | 193 |
| <i>Y. Wilks</i> | |
| 13. Semantics and Quantification in Natural Language Question Answering | 205 |
| <i>W. A. Woods</i> | |

| | |
|--|-----|
| 14. A Procedural Model of Language Understanding | 249 |
| <i>T. Winograd</i> | |
| 15. Semantic Aspects of Translation | 257 |
| <i>G. Hendrix</i> | |
| 16. Problems in Logical Form | 285 |
| <i>R. Moore</i> | |
| 17. From English to Logic: Context-Free Computation of "Conventional" Logical Translations | 293 |
| <i>L. Schubert and F. J. Pelletier</i> | |
| 18. A New Semantic Computation While Parsing: Presupposition and Entailment | 313 |
| <i>R. M. Weischedel</i> | |
| III. DISCOURSE INTERPRETATION | 327 |
| 19. Jack and Janet in Search of a Theory of Knowledge | 331 |
| <i>E. Charniak</i> | |
| 20. Resolving Pronoun References | 339 |
| <i>J. Hobbs</i> | |
| 21. The Representation and Use of Focus in a System for Understanding Dialogs | 353 |
| <i>B. Grosz</i> | |
| 22. Focusing in the Comprehension of Definite Anaphora | 363 |
| <i>C. Sidner</i> | |
| 23. So What Can We Talk About Now? | 395 |
| <i>B. Webber</i> | |
| IV. LANGUAGE ACTION AND INTENTION | 415 |
| 24. Generation as a Social Action | 419 |
| <i>B. Bruce</i> | |
| 25. Elements of a Plan-Based Theory of Speech Acts | 423 |
| <i>P. Cohen and C. R. Perrault</i> | |
| 26. Analyzing Intention in Utterances | 441 |
| <i>J. Allen and C. R. Perrault</i> | |
| 27. Points: A Theory of the Structure of Stories in Memory | 459 |
| <i>R. Wilensky</i> | |
| V. GENERATION | 475 |
| 28. Discourse Strategies for Generating Natural-Language Text | 479 |
| <i>K. McKeown</i> | |
| 29. Planning English Referring Expressions | 501 |
| <i>D. Appelt</i> | |
| 30. Description Directed Control: Its Implications for Natural Language Generation | 519 |
| <i>D. McDonald</i> | |
| VI. SYSTEMS | 539 |
| 31. BASEBALL: An Automatic Question Answerer | 545 |
| <i>B. Green, A. Wolf, C. Chomsky, and K. Laughery</i> | |
| 32. Conversational Language Comprehension Using Integrated Pattern-Matching and Parsing | 551 |
| <i>R. C. Parkison, K. M. Colby, and W. S. Faught</i> | |
| 33. Developing a Natural Language Interface to Complex Data | 563 |
| <i>G. Hendrix, E. Sacerdoti, D. Sagalowicz, and J. Slocum</i> | |

| | |
|--|-----|
| 34. Transportability and Generality in a Natural-Language Interface System | 585 |
| <i>P. Martin, D. Appelt, and F. Pereira</i> | |
| 35. GUS, A Frame Driven Dialog System | 595 |
| <i>D. Bobrow and the PARC Understander Group</i> | |
| 36. Toward a Natural-Language Capability for Computer-Assisted Instruction | 605 |
| <i>R. R. Burton and J. S. Brown</i> | |
| 37. SAM | 627 |
| <i>R. Cullingford</i> | |
| 38. A Conceptual Theory of Question Answering | 651 |
| <i>W. Lehnert</i> | |
| Index | 659 |
